ABOUT THE CONFERENCE: This three-day, hands-on school combines classroom presentations and working field applications covering all aspects of hotline operations and safety procedures for the electric utility lineworker. Participants are responsible for bringing their own rubber gloves, rubber sleeves, safety glasses, hard hats, body harnesses, and personal tools.

INFORMATION ON FIELD PRACTICES:

- Rubber goods inspection
- Regulator by-pass procedures, testing, operation
- Change-out transformer using a material handling bucket truck
- Moving a phase with an insulated link stick
- Change suspension bells on a stack corner running angle using an insulated link stick
- Change out arm pin and pole-top pin insulator on a running angle
- Car vs. pole accident, incident control with proper safety procedures
- Inspect and change out arrester and cut-out at 3-phase transformer bank
- Change out 3-phase steel tangent pole
- Self-rescue from an aerial device
- Pole climbing fall restraint systems demo stations
